- CGEN 5011** Clinical Topics in Geriatrics
- CGEN 5012** Symptom Control and Medical Care in End of Life Care A
- CGEN 5013** Symptom Control and Medical Care in End of Life Care B

Admission requirements

Students should hold a Bachelor's degree in health or social sciences from a recognized university, normally with honours not lower than second class, or completed a course of study in a tertiary educational institution and obtained professional or similar qualifications equivalent to our honours degree. They must also fulfill the 'English Language Proficiency Requirement' as stipulated by the Graduate School before being considered for admission.

Schedule and venue

On average, the sessions of 2-3 hours will be held every Saturday morning or afternoon for all teaching modules. Classes will be held in the Prince of Wales Hospital.

Teaching Faculty

Staff from the Faculties of Medicine and Social Sciences of the Chinese University of Hong Kong, as well as the Hospital Authority. A small number of teachers are from other tertiary institutions.

Assessment

1. The taught components will be assessed by 2-3 written examinations in year 1.
2. The project/ practicum report will be written up as thesis and graded as follows:
 - a) For part time students, it is graded at the end of year 2
 - b) For full time students, it is graded at the end of year 1

Graduate attributes

Graduates are expected to acquire a good understanding of the biological, socioeconomic, epidemiological, and clinical aspects of ageing as well as end of life care issues. They are able to play a role in health care policy decisions regarding the well being of elderly populations, contribute to improvements and maintenance of good standards of care in diverse care settings.
